CRELAN GROUP BALANCE SHEET EVOLUTION
FY 2021, FY 2022 and H1 2023 (Consolidated)

COMMENTS ON H1 2023 RESULTS

- 1 Loan portfolio continue to increase in H1 2023 (+0.6bn) even in the context of a significant contraction in credit market.
- 2 Client deposits continue to increase (+0.8bn in 1H 2023) with increase of term accounts volumes. The rise in market rate outweigh the rise in client depositor rate on saving accounts.
- 3 Increase of AuM in 1H 2023 (€+0.9bn Vs 2022) driven by positive net inflow and positive impact of market valuation.
- 4 Introduction by the NBB in 2022 of a sectoral systemic risk buffer requirement, which replaces the previously higher macro prudential credit risk IRB add-ons on RWA. Reduction of RWA in 1H 2023 thanks to corrections in the reporting of DTA/DTL between group's companies.
- 5 Continued increase of equity thanks to robust organic capital generation in 2022. Stable equity in 1H 2023 as a seasonal effect (1H is impacted by bank levies and dividend payment).
- 6 CET1 ratio increase as a result of the decrease of RWA in H1 2023, remaining comfortably high and well above regulatory minimums.

Business and financial performance in H1 2022 and H1 2023

Strong financial performance as Crelan Group generated €150.3m underlying earnings in H1 2023 (+119% vs. H1 2022)

CRELAN INCOME STATEMENT EVOLUTION H1 2022 and H1 2023 (Consolidated – APM)

COMMENTS ON H1 2023 RESULTS

- 1 NBI increases materially driven by exceptionally strong NII as a result of improved interest rates environment and modest competition on savings. The rise in market rate outweigh the rise in client depositor rate. Fee income are stable as lower fees on credit and insurance have been compensated by higher daily banking and invest fees. One off capital loss on bond portfolio (-€19.4m).
- 2 Opex grew compared to H1 2022 in the context of inflationary pressure (a.o. staff cost indexation). Agent commissions increase as there is a direct link between the bank revenues (NBI) and the agent commissions. Increase in bank levies due to the provision of potential reimbursements related to 2016.
- 3 CoR increases due to prudent provisioning (conservative economic assumptions, review of methodology for outstanding defaulted loans).
- 4 Very material increase of underlying earnings, driven by net interest income partially offset by prudent provisioning, one-off capital loss and inflation.
- 5 Excellent operational results allowed to fully absorb the large one off investment in IT migration and in the banking platform optimization which are impacting the specific items.
- 6 IFRS Net income, adjusted for bank levies is higher than H1 2022 (+2.5%).

Crelan Group Net Interest Income

NII and NIM growing, supported by volumes and margin improvement

Net Interest Income (€m) and Margin (%) – (Accounting data)

NII vs. H1 2022

+65.5%

+ €194.2m

Net Interest Margin

- Exceptionally strong NII as a result of wider margins on deposits.
- The negative rate environment had previously a large negative impact on the profitability of retail banks.
- The positive interest rate environment has improved and Crelan has faced in H1 2023 modest competition on savings. The rise in interest rates outweigh the rise in client depositor rates.
- Crelan is benefitting from its large stable retail deposit base and prudent Balance Sheet Management.

Crelan Group capital, leverage position & requirements

Significant and increased buffers above requirements

- As of May 1, 2022 the NBB introduced a new Belgian macro-prudential tool (Sectoral Systemic Risk Buffer) to ensure capital buffers will be available when risks on the mortgage market materialize. This buffer replaced the macro-prudential RWA add-ons on the IRB portfolio (5% on Belgian real estate exposure and 33% on Belgian real estate RWA). Note that this systemic risk buffer depends on the proportion of exposures secured by real estate to all exposures and can therefore vary throughout the year.
- Crelan must meet the 3% leverage ratio requirement. As of 30/06/2023, Crelan's leverage ratio stood at 3.91% on a consolidated basis and at 5.47% at the Federation perimeter ⁽²⁾. Crelan's target is to achieve a consolidated basis leverage ratio of 4.1% by 31/12/2024.
- Basel IV impact (2025 - 50% floor) will result in a CET1 ratio decrease between 1.9% and 4.8%.
